Our mission is to provide pre school and primary education for children in the Perth Hills region, based on the pedagogy and indications given by Rudolf Steiner

The Silver Tree Steiner School was initiated in 1997 with a playgroup, which through a dedicated group of parents has developed into the wonderful school we have today of over 100 students. We offer; Mothers Group, Playgroup, Kindergarten and Primary School.

The Steiner curriculum in the primary years is a work of art, thoughtfully designed to meet each developmental age. All instruction in the primary years - reading, writing, arithmetic, history, geography, botany and foreign language - is presented in an artistic way by the teacher and involves and develops the creative capabilities of the child.

Steiner schools educate the whole child, addressing equally the areas of academic study, artistic expression and practical skills in integrated ways. Through this balanced approach students develop clarity of thought, a sensitivity of feeling and a willingness to work, forming a foundation for balance in thought, feeling and action as adults.

At the Silver Tree Steiner School our fully qualified and passionate teachers work creatively to generate a genuine inner enthusiasm in each individual and to cultivate the child's respect for themselves and others.

We meet all the standards required by State and Federal Government, incorporating teaching methodologies which differ from mainstream schools by interweaving the Government curriculum with Steiner indications.
